Media Announcement

The Management of Mitchel-Lincoln Packaging Ltd. is proud to announce the acquisition of Induscorr, a division of Specialized Packaging Group L.P.

Induscorr is a leader in the production of specialty corrugated products. With its team of employees and their facilities, they produce a wide variety of flutes, distinguishing itself particularly in the triple wall and specialized containers.

Specialized Packaging Group, L.P. (SPG) is a Montreal based Group specialized in protective and engineered packaging with operations in 17 manufacturing locations in Canada, the U.S. – in the Midwest and California –, Mexico, France, Germany and Poland. SPG operates two plants in Canada, in Montreal and Toronto, under the Ivex name.

By acquiring Induscorr, Mitchel-Lincoln Packaging Ltd. expands its range of services and specialized value-added packaging products, becoming at the same time the first choice as a supplier of corrugated cartons in Quebec. With its two plants producing corrugated cartons in the province of Quebec, its manufacturing plant of small quantities, its association with Atlantic Packaging in Toronto and their partnership in the New Forest Paper Mill, Mitchel-Lincoln Packaging will surely become, by adding Induscorr, a landmark of the Quebec and the Eastern Canadian packaging market.

The Management of Mitchel-Lincoln Packaging welcomes into their family all employees of Induscorr. We would like to thank all of our active employees at Mitchel-Lincoln Packaging for their efforts and their commitment. Without the quality of their work over the years it would be impossible to proceed today with this news announcement. We are looking forward to better serving all of our customers with a complete line of corrugated products.
